A Guide to our
Interior Design Services

Your Vision, Brought to Life

So you're moving. Or maybe expanding?
Or just need a reconfiguration. How exciting!
The opportunity to create a whole new look,
filled with distinctive details that define who
you are as a company.

But you need some Interior Design help.
Now what?

Don't worry, we've done this before - we got
you.

We will be there to guide you through this
design process from the beginning planning
stages through project sign off.

Let us walk you through the process.

Ready?

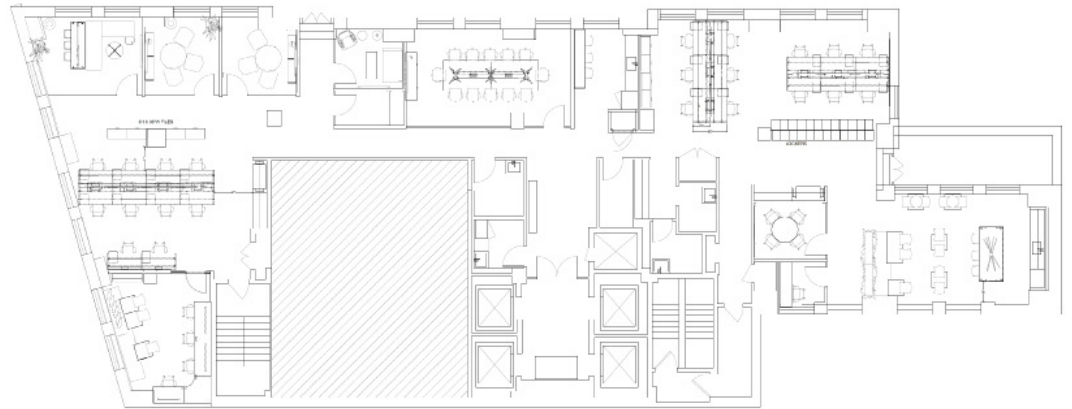

Ok, so how do we start?

Step 1: Send us your floor plan

You can request this from your broker, or the landlord's architect.

Perhaps a "test fit" layout has already been prepared, but it may not be exactly how you are envisioning the space.

We can help you design a functional layout by asking you questions and understanding your needs and pain points.

Don't have a floor plan?

As part of our services, we will come to your site and take measurements in order to create a floor plan for you.

Let's talk about aesthetics.

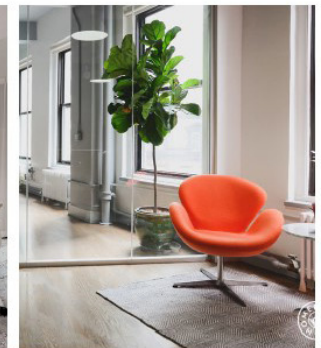

Step 2: Curation

Are you a professional services firm that requires a high-end combination of wood and stone? Or maybe you are a start-up looking for the perfect shade of paint to give your accent wall a pop of color.

Maybe your landlord offered building standard carpet and finishes, and you need help choosing the right palette that complements the entire interior.

Whatever it is, we can help guide you to the right design solution - tailored to you.

Once we determine the aesthetic, we will help to curate a fabric and finish palette that aligns with your vision.

Step 3: Showroom Tours

Once we have a good sense of your floor plan and the materials and finishes you envision, we will schedule manufacturer showroom tours with you so you can see the product in person.

Step 4: Drawings & Budgeting

We will then prepare preliminary drawings and a budget for your review. Generally the budget includes alternate options for consideration, as well as a cost for delivery and installation.

Step 5: Finalizing Decisions

We will work with you to refine all the details, make final selections & decisions, and schedule site visits for field verification of critical dimensions & electrical locations, and assess miscellaneous site conditions.

Step 6: Order Approval

All the i's have been dotted and the t's have been crossed. You've approved all pricing, finishes, drawings, and we are now ready to send the order into production!

Step 7: Production

Sit tight. Your furniture is in the production stage. During this time, we will be coordinating with your other vendors, such as electricians, AV/IT consultants, attending project meetings, and tracking your order!

Step 8: Delivery & Installation

The product has arrived at the warehouse and we are ready to schedule a delivery and installation date. Your Benhar Project Manager will be on site during this time to help manage the logistics and see that everything goes smoothly.

...And we're done!

Welcome to your new office space.

Thank you for considering partnering with us during this exciting time!

We can't wait to start this process with you.
